

Join us for the 1st ever

Northeastern North America Landscape Connectivity Summit

On behalf of the **Staying Connected Initiative**, the **Quebec Labrador Foundation** and **Center for Large Landscape Conservation** will host the first-ever bi-national gathering of key leaders and partners focused on advancing landscape connectivity conservation and restoration within and across borders in the five eastern-most Canadian provinces, seven northeast-most U.S. states, and traditional Indigenous territories of the region. Participants will share knowledge, successes, approaches and opportunities; build and foster regional collaboration across borders and cultures; and develop a shared vision for action.
